

Find a Doctor

Having a primary care doctor is the best way to manage your health. This ensures you get care from a doctor who knows all your health issues and reduces the risk of repeat tests and conflicting prescriptions. Once you find a doctor that you and your family are comfortable with, it is best to stick with him or her. Find a doctor near you below.

New York State Physician Profile Website

https://www.nydoctorprofile.com/NYPublic/dispatch?action=process_welcome

- Use the advanced search to find a provider by specialty in your area. All providers are listed and this is the best source for finding providers who accept straight Medicaid.
